

- LEF1 UP.V1 UP
- purine-containing compound metabolic process
- protein tetramerization
- regulation of hormone levels
- columnar/cuboidal epithelial cell differentiation
- negative regulation of protein phosphorylation
- KRAS.LUNG.BREAST UP.V1 UP
- blood circulation
- P53 DN.V1 UP
- cellular lipid catabolic process
- positive regulation of proteolysis
- positive regulation of apoptotic process
- neuron projection development
